Re: Additional information in response to Clean Air Act information request to Reliant dated Dec. 21, 2007

Dear Mr. Bumpers:

In accordance with Judith Katz's February 5, 2008 letter to you, attached is a list of the projects undertaken by Reliant or its predecessors at the Portland and Keystone plants for which EPA would like the additional information sought in Questions 4, 6, 9, and 10 of Enclosure 2 of EPA's December 21, 2007 Clean Air Act Section 114 letter. This list was developed following EPA's review of Reliant's previous responses to Section 114 letters seeking information concerning work performed at the Portland and Keystone plants.

Given that the bulk of the projects are associated with the Keystone plant, EPA requests that Reliant provide the information sought for the Portland projects within thirty (30) days of the date of this letter, and that Reliant provide as much of the information for the Keystone projects as possible within thirty (30) days, and provide all the remaining information on the Keystone projects no later than forty-five (45) days of the date of this letter. If Reliant is unable to meet these deadlines, please inform me as soon as possible.

If you or your client has any questions concerning this request, please call me at (215) 814-2692 and I will try to answer them.

Sincerely,

A handwritten signature in cursive script that reads "Doug Snyder".

Doug Snyder
Assistant Regional Counsel
